

# Novaplex™ Gastrointestinal Assays\*

Test for pathogens that cause gastrointestinal infections including bacteria, viruses, and parasites

## GASTROINTESTINAL INFECTIONS

### HIGH MULTIPLEX REAL-TIME PCR ASSAYS

Gastroenteritis is the inflammation of the lining of the stomach and small and large intestines. It is frequently caused by viruses but can also be caused by bacterial or parasitic infections.

The disease can be food-borne, water-borne, person-to-person, or occasionally through zoonotic spread, showing symptoms such as diarrhoea, vomiting, abdominal pain, and fever.

Gastroenteritis affects more than 20 million people each year in the US.

#### KEY FEATURES

##### Broad coverage of gastrointestinal pathogens

- Detection of 35 GI infection-causing pathogens across 5 panels
- 6 viral, 14 bacterial, 6 parasite, and 9 helminth
- 4 hours TAT (from extraction to results)
- All Novaplex GI assays can be run together

##### Automated system

- Provides a convenient work flow through a streamlined automation system
- Minimizes contamination and human error

#### SAMPLE TYPES

Stool

One Tube	Novaplex™ GI-Virus Assay	Novaplex™ GI-Bacteria(I) Assay	Novaplex™ GI-Bacteria(II) Assay	Novaplex™ GI-Parasite Assay	Novaplex™ GI-Helminth(I) Assay
Number of Targets	6	8	6	6	9

Novaplex™ Assays are For Research Use Only. Not for Use in Diagnostic Procedures.
